Flexem Flexem □□ Series Service Manual

F5-BA0002B

1. Description

Flexem F5-BA0002B Expansion Board Control PLC

3. Product Information

Flexem F5-BA0002B Expansion Board Control PLC

Input /

Output 2

Resolution 12-bit

Input/Output Signal Range Voltage:0-10V;Current 0-20mA/4-20mA

FullRange Customized (0~4096)

Conversion Precision

(full range) ±1%

Maximum Signal Input /

Impedance Input /

Output Load Range Voltage>2k ohms Current<500ohms

Power Supply 5VDC-15%/+20%, 3.2W max. The main unit is provided internally without external input

Wiring Structure Non-removable terminal block

Working Temperature -10~60ºC

Storage Temperature -20~70ºC

Environment Humidity 5%~95%RH(Non-condensing)

Installation CPU Front expansion board slot

Dimension 38mmx40mmx18mm
